

## 2018 SDi Global Assessment Report: The Laboratory Analytical & Life Science Instrumentation Industry

**The definitive market reference tool for the analytical and life science  
instrument and lab product industry**

The report covers 50+ individual instruments and related technologies with overviews categorized into 10 sections:

- Chromatography
- Life Science Instrumentation
- Mass Spectrometry
- Molecular Spectroscopy
- Atomic Spectroscopy
- Surface Science
- Materials Characterization
- Lab Automation
- General Analytical Techniques
- Lab Equipment

Each section also explores the current state of the competitive playing field and recent developments, and concludes with a 5-year market forecast.
